PROFESSIONAL SUMMARY

Full stack developer with **2+ years of experience** and **25+ delivered projects**, from landing pages to SaaS products with payments, automation, and AI. I built the frontend for a platform with **1,000+ active users** and an end-to-end PIX payment gateway. I currently lead development for my own SaaS products, combining product and business ownership with technical execution.

PROFESSIONAL EXPERIENCE

CEO & Full Stack Developer — Current
Raytickets · AI-powered WhatsApp B2B SaaS

- Lead product and development for a WhatsApp customer service, sales, and automation platform: real-time multi-agent inbox, CRM, campaigns, visual flow builder, AI agents, and Stripe/Mercado Pago billing.

Stack: TanStack Start, React, TypeScript, Elysia, Bun, Prisma, PostgreSQL, Socket.IO, React Flow, Stripe

Partner & Full Stack Developer — Current
PlanejaPost · Social media scheduling SaaS

- Develop a scheduling and publishing SaaS for creators and agencies across 6 social networks, with OAuth, workspaces, queues, PIX/card subscriptions, an admin panel, and an SEO-focused landing page.

Stack: TanStack Start, React, TypeScript, Elysia, Bun, Prisma, PostgreSQL, Better Auth, Stripe, Docker

Freelance Full Stack Developer — Current
Workana and direct clients

- Delivered 25+ websites, systems, APIs, integrations, automation, and AI projects. Maintain a 5.0 rating across 27 Workana reviews.
- Highlights: VipPets QR-code pet identification platform, Twilio AI calls, PIX payment automation, MEI lookup APIs, Python/Selenium bots and web scraping, and conversion- and SEO-focused landing pages.

Stack: React, Next.js, TypeScript, Node.js, Python, Selenium, Hono, Express, Docker

Full Stack Developer — 6 months · Ended
Oasyfy · PIX payment gateway

- Built the end-to-end payment platform: PIX API, admin and seller portals, KYC, custom checkout, webhooks, acquirer routing, and a push-enabled PWA.

Stack: React, Vite, TanStack Query, Bun, Elysia, Prisma, PostgreSQL, Redis, BullMQ, Docker

Frontend Developer — 1 year 6 months · Ended
Astrofy · Telegram/Discord bot automation SaaS

- Owned the frontend for a platform with 1,000+ active users, including a visual flow builder, checkouts, subscriptions, remarketing, affiliates, real-time chat, and an admin panel.

Stack: Next.js, React, TypeScript, Tailwind CSS, TanStack Query, React Flow, Zustand, Stripe
